

i-count

Store Visitor Counting System and Volume Control System

Mass identification and tracking of items at loading docks and logistic gates

I-count systems, designed to provide solutions for volume of visitors in stores, can be scaled as any size of stores.

Special displays can be set up as "plug and play" according to size of the store entrances.

System can be easily monitored by it's cloud server and programmable embeded structure.

Disclaimer: Our company, reserves the right to change its products and services at any time without notice. Our recommendations are based on our best knowledge and experience.
