## Fast and reliable RAIN RFID Portal Reader

Mass identification and tracking of items  
at loading docks and logistic gates

The i-port reader is designed for use where large  
numbers of RFID tagged items require identification  
and tracking quickly and accurately.

Independent dual units can be installed on loading  
docks and gates and enables tracking of items in entire  
process and various applications.

Built-in computer and large touch screen allows easy  
integration with existing data management and work  
flow.
